AS PART OF THE ANNUAL

HANS M. F. SCHULMAN & ABNER KREISBERG AUCTION

545 FIFTH AVENUE, NEW YORK, N. Y.

FOREWORD

It is a great privilege to finally be able to sell this unusual collection of Latin American gold coins. Many years we have waited to be granted the privilege to sell these magnificent rarities.

Rarely have so many rarities of the Independent American Republics been seen in one sale, and never has such condition been encountered.

When or where did we see in one sale an **uncirculated** set of 20, 10, 5 and 2½ Pesos of Salvador together with a **brilliant proof** set of 100, 50, 25 and 5 Bolivares 1875? Where did a 4 Pesos of Paraguay, a 20 Pesos of Honduras and a 60 Pesos of Mexico get offered for sale in the same half hour?

Experts on numismatics of the old and new Spanish World, Messrs. X. & F. Calico have been willing to catalogue these coins in their superb way. Both Xavier and Fernando Calico are known to every collector the world over.

All of us are familiar with the superb cataloguing done in the beautiful palatial establishment on the century old Plaza del Angel in Barcelona, Spain.

It is a great privilege that they have given their knowledge and time to make this collection a special presentation in the annual popular Kreisberg-Schulman sale. Mr. Xavier Calico is at present president of the I.A.P.N. whose 15th Congress is taking place May 16th-19th in New York.

These following lots are being sold as part of the schedule in the annual Kreisberg-Schulman sale numbering (2250-2376). However, since they are a separate part and a completely detached collection from the magnificent Kreisberg-Schulman consignments, the consignor of these 125 Latin American gold lots has asked to have these coins presented in a separate catalogue.

Therefore, before we continue the Kreisberg-Schulman sale of 600 gold rarities in the 4th Saturday afternoon session, we will sell these 125 lots numbered 2250-2376 at 2:30 P. M. on May 21st, and we congratulate in advance the new owners of these rarities.

ANOTHER IBERO-AMERICANO PUBLICATION

Many collectors will remember the years that the firms of X. & F. Calico and Hans M. F. Schulman published the popular Ibero-Americano Boletín de Numismática written in Spanish and English by the most knowledgeable Mr. Xavier Calico, now President of the International Association of Professional Numismatists.

Many collectors will also remember the auction catalog of the Marquis de LL Collection in 1952, which demonstrated so clearly the close collaboration between the two firms. It is the continuation of the Boletín and the Marquis de LL Collection which has brought us together again in this superb sale of South American gold rarities. Latin America and Spain meet in the business world of New York City where Spanish culture has always exerted much influence. Did not Spanish milled dollars function as legal tender until as late as the year 1845? It is important to know that Latin American gold coins of the independent republics are only on the threshold of their popularity. Gold coins of many of the European countries have increased considerably in value, whereas the Latin American series have not shown much increase at all in valuation. Former import currency restrictions in the Latin American countries hampered the popularity growth. Now we consider collecting Latin American gold coins one of the best numismatic investments. In the 28 years that we have been established in New York, we only saw 2 specimens of the Paraguay 4 Pesos offered for sale and only 2 sets of the Venezuela 1875 proofs. Never have we encountered an uncirculated set of Salvador's 1892 coins and we personally never handled a 20 Peso of Honduras in all our years of selling coins. The coins mentioned above are greatly undervalued in this catalog. The possession of any of these rarities is considered in the realm of reaching almost the impossible.

We hope that the many collectors interested in these series will find in the collaboration of Hans M. F. Schulman and X. & F. Calico an enhancing combination of Spanish and North American numismatics.

REPUBLICA DE HONDURAS

It is really very difficult to make a responsible valuation of the following extremely rare set of Honduras. In spite of the fact that there is an increasing interest in Numismatics of Latin America this specialty is still far away from what it should be.

Anyway we are sure that in a short time the value of these coins will increase by many times today's figures.

REPUBLICA DEL PARAGUAY

As happens with all the coins of such egregious rarity it is difficult to fix the value of this coin. It lacks in the most important collections and in our opinion the figure of \$10,000 should be considered as a good investment.

REPUBLICA DE EL SALVADOR

Evidently the values on Friedberg for the following coins are too low. It is difficult to acquire occasionally one of the pieces of El Salvador, but it is almost impossible to find the complete set like it is offered in this sale. Occasionally a single piece is obtainable.

In our opinion this set should be sold at not less than \$5,000 or even more, especially in this Extr. F. condition which we have never seen.
